SMART Tekankan Komitmennya atas Minyak Kelapa Sawit Lestari

Jakarta, 27 April 2010 – PT Sinar Mas Agro Resources and Technology Tbk (“SMART”) hendak menekankan komitmennya untuk mencapai produksi minyak kelapa sawit yang lestari. Terhitung sejak 4 Februari 2010, perusahaan telah mengumumkan bahwa pengembangan di atas lahan yang memiliki Stok Karbon Tinggi (antara lain, di atas lahan gambut maupun hutan primer) tidak akan dilakukan dan bahwa konservasi keanekaragaman hayati akan dipertahankan di atas lahan yang memiliki Nilai Konservasi Tinggi. Sebagai sebuah badan usaha, SMART selalu mematuhi hukum dan peraturan perundang-undangan nasional yang berlaku, serta prinsip-prinsip dan kriteria Roundtable on Sustainable Palm Oil (“RSPO”). Komitmen ini berlaku atas semua perkebunan yang dimiliki dan dikelola baik oleh SMART maupun perusahaan induknya, Golden Agri-Resources Ltd (“GAR”).

SMART telah bekerjasama dengan Control Union Certification (“CUC”) dan BSI Group (“BSI”) untuk secara independen melakukan verifikasi atas laporan-laporan Greenpeace. Penunjukkan CUC dan BSI telah melalui proses yang melibatkan konsultasi dengan Unilever, yang saat ini bertindak sebagai Presiden RSPO. Proses verifikasi juga akan dibantu oleh Prof. Dr. Bambang Hero Saharjo dan Dr. Ir. H. Yanto Santosa, dua tenaga ahli yang merupakan akademisi senior dan peneliti konservasi hutan Fakultas Kehutanan Institut Pertanian Bogor, perguruan tinggi agrikultur terdepan di Indonesia.

Menjawab laporan terakhir yang diterbitkan Greenpeace, berjudul “*Sinar Mas – Rainforest and Peatland Destruction*”, SMART menyatakan bahwa verifikasi atas klaim yang ada di laporan tersebut akan menjadi bagian proses verifikasi yang dilakukan CUC dan BSI. Sementara itu, perusahaan menanggapi segala bentuk pelanggaran atas kebijakan praktik berkelanjutan secara serius dan telah menjatuhkan sanksi suspensi kepada manajer perkebunan yang bertanggung jawab atas area yang diliput oleh laporan Greenpeace tersebut.

Minyak kelapa sawit adalah satu produk andalan dan turut membantu mengentaskan kemiskinan di Indonesia. Industri kelapa sawit menyediakan lapangan pekerjaan secara langsung kepada lebih kurang 4,5 juta jiwa di Indonesia dan, pada tahun 2009, memberikan kontribusi pendapatan ekspor sebesar US\$10,4 miliar atau 11 persen dari total ekspor non-migas. Selain itu, produk kelapa sawit adalah sebuah komponen penting dalam mata rantai pangan, yang memberikan dunia kemampuan memenuhi peningkatan permintaan atas produk pangan. Keberadaan minyak kelapa sawit telah memberikan cakupan produk yang luas – dari produk pangan hingga kosmetik – yang terjangkau.

Tentang SMART dan GAR

SMART adalah salah satu perusahaan produsen barang konsumen berbasis kelapa sawit yang tercatat di bursa dan terbesar di Indonesia. Kegiatan usaha utama SMART adalah pembudidayaan dan pemanenan kelapa sawit, pemrosesan tandan buah segar menjadi crude palm oil (CPO) dan palm kernel (PK), dan penyulingan CPO menjadi produk bernilai tambah seperti minyak goreng, margarin dan lemak masak.

Didirikan pada tahun 1962, SMART saat ini memiliki perkebunan kelapa sawit dengan total luasan lahan sebesar lebih kurang 134.000 hektar (termasuk perkebunan plasma). SMART juga mengoperasikan 15 *mills*, 4 *kernel crushing plants* and 3 *refineries*.

Selain memproduksi minyak curah dan industrial, produk hasil refinasi SMART juga dipasarkan dengan beberapa merek dagang seperti Filma dan Kunci Mas. Kini, merek dagang tersebut dikenal dengan kualitasnya yang tinggi, serta menguasai pangsa pasar yang signifikan di segmen pasarnya masing-masing di Indonesia.

SMART adalah anak perusahaan GAR, salah satu perusahaan berbasis kelapa sawit terbesar di dunia yang juga tercatat di Bursa Singapura. Hubungan dengan GAR memberikan keuntungan bagi SMART dengan skala ekonomisnya dalam hal manajemen perkebunan, teknologi informasi, penelitian dan pengembangan, pembelian bahan baku, dan akses terhadap jaringan pemasaran yang luas, baik domestik maupun internasional.

SMART Reaffirms its Commitment to Sustainable Palm Oil

Jakarta, 27 April 2010 – PT Sinar Mas Agro Resources and Technology Tbk (“SMART”) would like to reaffirm that it remains committed to achieving sustainable palm oil production. With effect from 4 February 2010, the company announced that it will not develop on land with High Carbon stock (i.e. on peat land and primary forests) and will conserve biodiversity by not developing land assessed as High Conservation Value. As a business, SMART complies with national laws and regulations and the principles and criteria of the Roundtable on Sustainable Palm Oil (“RSPO”). This commitment applies to all plantations owned and managed by SMART and its parent company, Golden Agri-Resources Ltd (“GAR”).

SMART has engaged Control Union Certification (“CUC”) and the BSI Group (“BSI”) to verify independently, reports by Greenpeace. The two agencies have been jointly appointed, following consultation with Unilever, who currently chairs the RSPO. The verification is assisted by Prof. Dr. Bambang Hero Saharjo and Dr. Ir. H. Yanto Santosa, two experts who are senior academicians and forestry conservation researchers at Bogor Institute of Agriculture’s Faculty of Forestry, Indonesia’s leading institute of agriculture.

In response to the latest report published by Greenpeace, titled “Sinar Mas – Rainforest and Peatland Destruction”, SMART stated that it would verify these claims as part of the verification process by CUC and BSI. In the meantime, the company views any breach of its sustainability practices seriously and has suspended the plantation manager responsible for the area highlighted in the Greenpeace report.

Palm oil is an important product and helps to alleviate poverty in Indonesia. The industry provides direct employment for approximately 4.5 million persons in the country and, in 2009, generated US\$10.4 billion worth of exports or 11 percent of Indonesia’s non oil and gas exports. In addition, the product is a vital component in the food chain, allowing the world to meet its growing demand for food. The presence of palm oil makes a wide range of products – from food to cosmetics – affordable for households.

SMART is one of the largest, publicly-listed, integrated palm-based consumer companies in Indonesia. SMART's primary activities are cultivating and harvesting of palm trees, processing of fresh fruit bunches into crude palm oil (CPO) and palm kernel (PK), and refining CPO into value-added products such as cooking oil, margarine and shortening.

Founded in 1962, SMART currently has palm plantation with total coverage area of approximately 134,000 hectares (including plasma). SMART also operates 15 mills, 4 kernel crushing plants and 3 refineries.

Besides bulk and industrial oil, SMART's refined products are also marketed under several brands such as Filma and Kunci Mas. Today, those brands have been recognized for their high quality, presently command significant market share in their respective segmentation in Indonesia.

SMART is a subsidiary of GAR, one of the largest palm-based companies in the world which is listed on the Singapore Exchange. This relationship benefits SMART with its economies of scale in plantation management, information technology, research and development, sourcing of raw material, and access to a wide domestic and international marketing network.
