Sinar Mas Biodiesel Profile

Sinar Mas entered the biofuels industry in 2013 and has integrated its palm oil capabilities to cater to biodiesel production. We produce biodiesel from our two factories located in Tarjun, South Kalimantan, and Marunda, Jakarta. The FAME we produce is in conformance of EN 14214 specification and exported to various countries since the start of production.

The factory in Tarjun opened in 2015 with an equipped refinery processing area. It has a strategic location close to the centre of Sinar Mas' palm oil downstream operations with a steady supply of raw materials and seamless integration of the feedstock to production line. The second factory in Marunda opened in 2016, and is located to have direct access to the customer.

Sinar Mas Glycerin Profile

Sinar Mas Agribusiness and Food produces 100% palm oil feedstock on its onsite plant. Our product is both non allergic, non GMO Refine Glycerin and conforms to USP 41 monograph. We are one of the largest Asian producer of kosher and halal certified USP Grade Glycerin, with a production capacity of 200 metric ton per day. Our refined glycerin has a minimum 99.7% purity specification and is produced from high quality palm oil from our plantation.

Production Facilities

State of the art production process, supervised by technical experts.

Extensive research and tight quality control in dedicated biodiesel laboratory to ensure consistent product quality.

Production facility conveniently located near dedicated jetty, ensuring the smooth distribution of products.

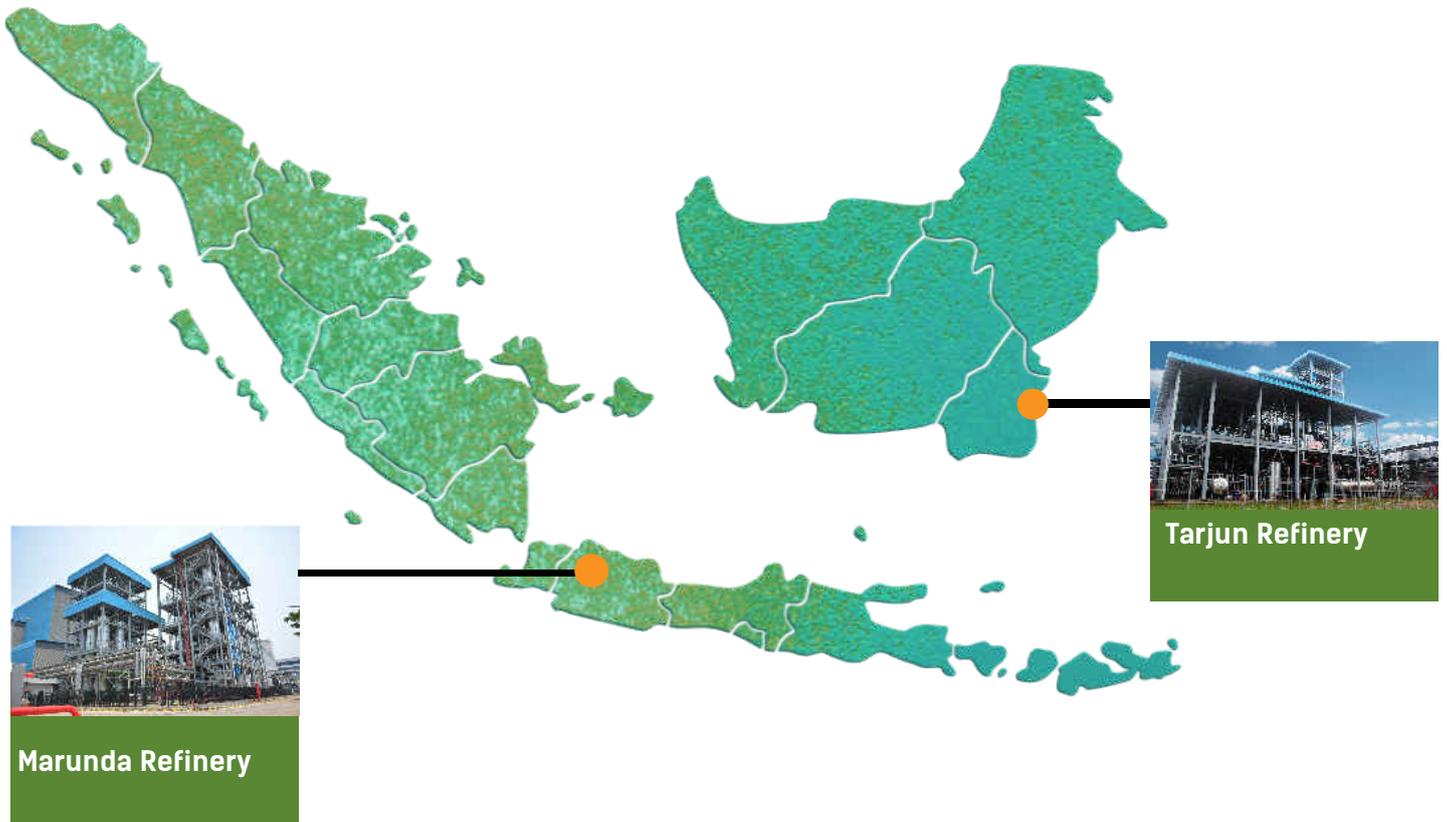

Integrated and modern biodiesel plant, with clear boundaries between food-grade and energy-grade raw material.

Biodiesel plants are integrated with Sinar Mas palm oil production facilities, and strategically located with total capacity of 896,000 kL/year.

- Efficient logistics of raw material procurement and distribution to consumers.
- Tarjun refinery close to the raw material location and non-PSO/industry customers (mining in Kalimantan and Sulawesi).
- Marunda unit close to majority market in Java and South Sumatra.
